JASON BENJAMIN

AI Product Manager & Builder — EdTech · M.Ed. Educational Management

jsn.benjamin@gmail.com · 010-5371-9266 · Seoul, Korea · www.jason-portfolio.com

PROFILE

Product manager who builds: turns problems Korean teachers and parents describe into AI products, from the first interview to the App Store.

10+ years in Korean English academies, an M.Ed. in Educational Management, and six AI education products built solo. Chekki AI is live on the App Store and Google Play; Chekki Schools is in final testing ahead of a pilot.

At VodaBi, builds the frontend, backend and database of a voice-AI sales training platform as a hands-on engineer, now going into use with two enterprise clients.

EXPERIENCE

Full-Stack Engineer · VodaBi July 2026 – Present

Voice-AI sales training platform · Korean-speaking team

- Improved and revamped the existing platform, rebuilding its frontend, backend and database, and shipped it to production in about 3 weeks.
- Platform is going into use with two enterprise clients for employee sales-skills testing.
- Split post-call grading into a scoring step and a feedback step, so coaching always matches the score.
- Kept the AI customer in role when calls open with background noise or unclear audio.

Founder & EdTech Product Manager · Chekki EdTech Solutions Jan 2024 – Present

AI products for Korean English academies and families · Seoul

Chekki Schools — Academy Platform (in final testing, pilot planned)

- Foreign teachers record one voice note per class; it becomes a Korean parent report, reviewed by a Korean teacher before families receive it.
- Teacher interviews showed AI homework checkers give parents wrong answers because they can't see the curriculum. Built a platform where teachers load answer keys, so grading matches what was taught.
- Rewrote the report prompts after native Korean readers said drafts sounded machine-written.

Chekki AI — Bilingual Homework App (App Store and Google Play)

- Led the app from idea to launch: parents scan homework and get bilingual grading.
- Privacy-first by design: worksheet images are discarded after grading and results deleted after 30 days.

Benchmark AI — ESL Assessment Platform

- Maps student mastery to CEFR and Cambridge YLE and flags stalled progress early, before parents consider leaving.

Chekki B2B Command Center — Academy Communication Portal

- Built a Make.com + Gemini pipeline turning teacher notes into bilingual parent messages, cutting reporting time by 80% across 1,200+ messages.

EduPlanner Pro — LLM Scheduling Engine

- Cut term timetabling from 40 hours of manual work to a 10-minute run.

Curriculum Lead & Senior Educator · Blend ENG Academy · YBM PSA Seocho · Seoul Feb 2019 – Feb 2026

EFL/ESL instruction · Curriculum design · Assessment design

- Wrote a 20-volume commercial English textbook series (phonics to test preparation), sold commercially and used daily.
- Designed a school-wide diagnostic benchmark for 100+ students; the basis for Benchmark AI.
- Ran bilingual parent communication and progress reports as a homeroom teacher.

English Teacher · English academies (hagwons) · Korea 2015 – 2019

SKILLS

Product: product strategy, PRDs, 0-to-1 development, customer discovery, user research, go-to-market, B2B SaaS, B2C mobile, retention analysis

AI and engineering: LLM integration, prompt engineering, AI evaluation with native speakers, structured outputs, realtime voice AI, React, TypeScript, Node.js, Firebase

Domain: EdTech, EFL/ESL, CEFR and Cambridge YLE, hagwon operations, English–Korean localisation

EDUCATION AND LANGUAGES

Master of Education (M.Ed.) — Educational Management · University of Essex 2022

Bachelor of Commercial Law (LL.B.) · University of the Western Cape 2013
